REFERENCING THE FRONTRUNNERS QUADRANT

PROVIDERS MUST ABIDE BY THE FOLLOWING GUIDELINES WHEN REFERENCING:

» When using the FrontRunners quadrant in promotional materials, you must include a link to the published quadrant, so users can see the full and proper context.

» You may quote or display the most recent FrontRunners quadrant provided it is used in its entirety and presented exactly as the original. No edits or changes to the graphic are allowed.

» You may quote your company’s Capability and Value scores (for example, “… with a Capability score of 4.51 out of 5 and a Value score of 4.68 out of 5”); however, you may not quote the component scores or associated percentile rankings that make up the Capability and Value scores.

» The FrontRunners Placement Badge may be used in perpetuity, provided the required disclaimer appears along with the Badge image and a link to the published FrontRunners quadrant:

The content for the FrontRunners quadrant is derived from actual end-user reviews and ratings as well as vendor-supplied and publicly available product and company information that gets applied against a documented methodology; the results neither represent the views of, nor constitute an endorsement by, Gartner or any of its affiliates.
» The FrontRunners Placement Badge may not be used to imply an award.

» You may not compare your company’s position or scores against any other provider, or use FrontRunners content to criticize a competitor.

» FrontRunners content is based largely on product reviews from end users—not from Gartner Research. For this reason:
  • You may not imply that the FrontRunners graphic is the same as, or similar, to a Gartner Magic Quadrant.
  • You may not imply that the FrontRunners report is the result of Gartner Research evaluation (Research Analysts do not contribute to FrontRunners).

» Except in digital media with character limitations (e.g., Twitter), the following disclaimer MUST appear with any/all FrontRunners reference(s) and graphic use:

The content for the FrontRunners quadrant is derived from actual end-user reviews and ratings as well as vendor-supplied and publicly available product and company information that gets applied against a documented methodology; the results neither represent the views of, nor constitute an endorsement by, Gartner or any of its affiliates.
